ROAD TO HIRE BUSINESS ANALYTICS APPRENTICESHIP

A career in tech puts your future in your hands. Road to Hire (R2H) believes your hard work should be met with opportunity, and with a focus on tech, doors will be opened that could shift your life's trajectory. Breaking through in tech is challenging, and R2H knows it takes hands-on training backed by a strong community.

R2H is seeking talented, tech-hungry high school or GED graduates who are looking to break into the Business Analytics tech field without a college degree! At Road to Hire, you will be given access to cutting-edge resources and state-of-the-art facilities to learn and polish your craft.

BECOMING A R2H APPRENTICE

Road to Hire offers a rigorous, six-month, PAID Apprenticeship. Apprentices are paired with strong mentors along the way and learn the necessary technical and professional development skills to kickstart high-earning tech careers at premier Charlotte employers like Ally, Bank of America and Red Ventures.

Becoming a R2H Apprentice is learning skills and gaining expertise in the tech field, in addition to joining a community of peers who will support and motivate each other.

BUSINESS ANALYTICS AND PROFESSIONAL DEVELOPMENT

Apprentices will engage in various technical projects, presentations, exams and more, where they will apply the technical and professional development skills learned within each learning module.

By the end of the Business Analytics Apprenticeship, apprentices will:

- Have a foundational knowledge in Data, Excel, SQL, Python and Tableau
- Be able to gather, clean, organize, analyze and visualize data
- Be able to present information in the form of metrics, KPIs and reports
- Know how to analyze current and historical data to find trends

Professional Development skills gained include but are not limited to the following:

- Public speaking
- Time management
- Networking
- Interview training

STUDENT REQUIREMENTS

To participate in the apprenticeship program, students must meet these requirements:

High school graduate or GED

19-26 years old

Be a member of a group that is historically underrepresented in tech

Have authorization to work in the US

Live in the Charlotte metropolitan area and have reliable transportation
